AEROPRO 40

A SMART & CONNECTED AIR PURIFIER

The AEROPRO 40 is our most modern model, smart and stylish to boot. It is a high-end air purifier that has been designed to adapt to all medium-sized rooms – studio flat, bedrooms, living rooms, hotel rooms, conference rooms, small offices, and receptions areas, to name a few.

This modern air purifier covers any space from 0 to 40 m² (450 ft²) thanks to its four speed levels. On Automatic mode, the fan speed adjusts automatically depending on the level of indoor air pollution detected by the device.

Quiet as a whisper in speed 1, its power will likewise impress you in speed 4. As with all our products, it comes equipped with a top-of-the-line multi-layer filter with a broad spectrum of action against all forms of air pollution.

AEROPRO 40

MEDICAL-GRADE AIR FILTRATION

The AEROPRO 40 uses a combination of best-in-class technologies to filter and purify the air. It relies on a **proprietary 8-step filtration process** to remove all airborne pollutants from your indoor air.

This process consists of a pre-filter, natural bamboo fibre with a silver ion coating, a medical-grade HEPA H13 filter, an activated charcoal filter, photocatalysis, UVC sterilisation, and ionisation (negative ions). With our multi-layer technology, you no longer need to choose between an activated carbon filter or a HEPA filter: you can take advantage of both these high-efficiency filters.

The AEROPRO 40 will efficiently remove all forms of pollution present in the air: **germs** (viruses, bacteria, and mould spores), **fine particles and nanoparticles** (PM1.0, PM2.5, PM10), **allergens** (pollen, dust, dust mites, animal dander), **chemical pollutants** (such as VOCs, formaldehyde, carbon monoxide, and many other toxic gases), **smoke** (including tobacco smoke and exhaust gases), **bad odours**, and more.

The AEROPRO 40 purifies the air several times per hour to keep up with continuous pollution. This is possible thanks to its **powerful purification capacity of up to 420 m³/hr** (otherwise known as airflow or "CADR"). It relies on four different fan speeds to perfectly adapt to the need of the space at any given time.

POWERFUL AIR CIRCULATION

Its design has been specifically developed to **ensure optimal air circulation**. Most notably, it relies on a 360° air inlet so that it can take in air from all angles. The fan is energy-economic yet powerful, and it has a vertical output to ensure proper air flow in the room.

AEROPRO 40

QUIET AS A LEAF IN THE WIND

The AEROPRO 40 is remarkably quiet, allowing it to **easily blend into any environment**. Quiet as a whisper in speed 1, its power in speed 4 will equally blow you away.

It comes with a convenient Sleep mode so that you can rest without being disturbed by the noise level or light coming from your device. Our air purifiers remove 99.97% of airborne allergens (pollen, pet dander, dust, dust mites), providing you with **better sleep quality**.

DESIGNED TO MAKE YOUR LIFE EASIER

The AEROPRO 40 air purifier comes with several unique features aiming to improve your experience:

- Built-in display
- Built-in handles so that you can move it around effortlessly
- Touch-sensitive buttons and a remote control
- Easy-to-use smartphone app
- Filter change alarm.

Filter changes made easy through the bottom cover: it only takes a few seconds! The AEROPRO 40 purifies the air multiple times per hour in order to fight new incoming pollutants.

REAL-TIME AIR QUALITY DATA

Our AEROPRO 40 air cleaner comes with built-in sensors which continuously monitor air pollution and help you obtain a **complete understanding of your indoor air quality**. It displays the pollution levels directly on its built-in screen (which also sync to your phone). In response to changing pollution levels, the AEROPRO 40 is capable of **automatically adjusting its fan speed** in order to maintain safe levels based on guidelines published by the World Health Organization (WHO).

It is equipped with a very precise PM2.5 sensor with an accuracy of half a micron in order to guarantee clean air by tracking levels of fine particles, airborne allergens, droplets, and aerosols.

SMART & CONNECTED

All of our air purifiers come **Wi-Fi equipped** so they can integrate with the Tuya Smart app (available for both Android and iOS). This allows you to **control your devices directly from your phone or with voice commands** (compatible with Google Assistant, Alexa, and Siri). You can now control your air purifier and see your indoor air quality remotely.

The AEROPRO 40 is a smart device that comes ready to integrate into your **home or office automation**. You can manage your fleet of air purifiers remotely and all in one place. You can also **program various scenarios** according to your needs: decide when it should turn on or turn off; when to enter Automatic mode or Sleep mode; control when it should use UVC sterilisation, photocatalysis, ionisation; and more.

Range of action	From 1 to 40m ²
CADR (Clean Air Delivery Rate)	Up to 420 m ³ /h (depending on fan speed)
CCM (Cumulate Clean Mass)	P3/F3
Niveaux de vitesse	1-2-3-4 (4 levels)
Multi-layer filter	Pre-filter + Antibacterial Filter + Medical-grade HEPA H13 Filter + Activated Charcoal Filter + Photocatalysis
Lifespan of filter	Up to 12 months (filter change indicator)
Additional purification technologies	<ul style="list-style-type: none"> - UVC sterilisation (Two UV lamps at 254nm) - Ionisation (5 million pcs/cm³)
Noise level (decibels)	<ul style="list-style-type: none"> - Speed 1: 32 dB (whisper) - Speed 2: 43 dB (average home noise) - Speed 3: 54 dB (faint rain) - Speed 4: 60 dB (normal conversation)
Power input	ECO stand-by power ≤2W <ul style="list-style-type: none"> - Speed 1: 12 W - Speed 2: 18 W - Speed 3: 32 W - Speed 4: 49 W
Input voltage & frequency	Fully compatible with both EU and UK plugs. AC 220V - 50Hz
Dimensions	27.5 cm (diameter) x 54.2 cm (height)
Weight	6.0 kg
Air quality indicator	Excellent: green Good: blue Poor: yellow Very poor: red
Other characteristics	<ul style="list-style-type: none"> - Filter change indicator - Timer function - Night mode
Connectivity	<ul style="list-style-type: none"> - Compatible with voice controls (Alexa, Google Assistant & Siri) - Compatible with Tuya Smart
Warranty	<ul style="list-style-type: none"> - 15-day money-back guarantee - 2-year Limited Warranty
